## Professional Summary

---

Data Engineer with experience in designing, developing, and optimizing high-performance data solutions. Skilled in SQL, Python, Spark, AWS Redshift, ETL pipelines, and data modeling. Proven ability to build scalable data structures, improve analytics workflows, and collaborate with cross-functional teams. Passionate about leveraging big data technologies to drive actionable insights and business growth.

## Technical Skills

---

- Programming and Query Languages: SQL, Python, Scala, SparkSQL, PL/SQL, HiveQL
- Big Data Cloud Technologies: Hadoop, Hive, Spark
- AWS Services: AWS Glue, Redshift, S3, Lambda, Secrets Manager, QuickSight
- ETL Data Warehousing: Informatica, SSIS, DataStage, OLAP, Data Modeling
- Database and Storage: PostgreSQL, MySQL, NoSQL (MongoDB, DynamoDB)
- Automation Scripting: Python

## Professional Experience

---

**Data Engineer**, UST , Trivandrum

June 2024 - Current

- Designed, developed, and optimized ETL pipelines to process high-volume datasets using SQL, Python, and Spark.
- Built data warehouses and OLAP structures in AWS Redshift.
- Modeled data and metadata to support ad hoc and pre-built reporting for analytics teams.
- Collaborated with cross-functional teams to develop cloud-native data solutions, improving data ingestion, transformation, and analytics processes.
- Analyzed large-scale datasets to identify patterns in customer behavior, optimize pricing strategies, and enhance business intelligence reporting

**Data Science Intern**,

October 2023 – March 2024

- Developed and optimized machine learning models for predictive analytics using Python and Scikit-Learn.
- Worked with large datasets, performing data cleaning, preprocessing, and feature engineering for model accuracy.
- Built data visualization dashboards using Matplotlib, Seaborn, and Tableau to present insights to stakeholders.
- Conducted exploratory data analysis (EDA) to identify key patterns and business insights.

## Projects

---

### Automated Data Pipeline for Real-Time Data Processing

- Designed and implemented an end-to-end automated data pipeline using AWS services, ensuring seamless data movement, transformation, and processing.
- Utilized AWS Lambda for event-driven orchestration, Amazon S3 for raw data storage, and AWS Glue for ETL processing, enabling efficient data transformation across Bronze, Silver, and Gold layers with validation checks.
- Secured sensitive data by integrating AWS Secrets Manager for encryption key storage, ensuring compliance with data security and governance standards.
- Optimized data processing workflows, reducing latency and improving scalability, allowing stakeholders to access real-time, enriched insights for better decision-making.

### KPI Measurement and Data Enrichment for Store Shelf Optimization

- Optimized store shelf layouts by measuring key performance indicators (KPIs) and enriching data to enhance

product visibility and space utilization.

- Developed scalable data integration and processing pipelines using AWS Glue for ETL, Amazon S3 for data storage, and AWS Lambda for serverless data transformation.
- Conducted in-depth analysis of product placements, sales performance, and inventory trends, applying transformation and aggregation logic to generate data-driven insights for store shelf optimization.
- Automated data workflows and reporting using Amazon Redshift and AWS QuickSight, enabling real-time monitoring and decision-making.

### Data Analysis

- Conducted an in-depth analysis of large-scale property rental data to uncover pricing trends, customer preferences, and key business insights.
- Designed and implemented scalable data processing workflows using AWS Glue for ETL, Amazon S3 for data storage, and AWS Lambda for serverless data transformation to ensure efficient data handling.
- Optimized structured and unstructured data processing using SQL and Python, reducing data transformation time.
- Delivered data-driven recommendations through custom reports and dashboards, leveraging AWS QuickSight for visualization, empowering stakeholders to make informed business decisions.

### Education
